

Dream11 User Manual

Overview

Dream11 is an Indian fantasy sports platform that enables users to participate in daily fantasy sports contests, primarily focused on cricket. Users can create fantasy teams, participate in contests, and track performance using a point-based system.

Our platform provides essential information on the landing page, including FAQs, customer testimonials, and other details about the company.

Dream11 is proudly developed in India, by Indians, to cater to the Indian audience. To enhance accessibility, we offer support for major regional languages. Player selection and exclusion rationales are presented in regional language audio formats, accessible by tapping a button. Users can set their preferred language via the navigation bar.

2. Navigating and Selecting Matches

Structure routes

Routes

2.1. Landing Page (/)

- **Purpose:** Entry point to the application.
- **Key Features:**
 - **About Us:** Provides information about the platform, including its goals, features, and background.
 - **FAQs:** Frequently Asked Questions to assist users in understanding the platform.
 - **Get Started:** A prominent Call-to-Action (CTA) button that directs users to the homepage (/home).

2.2. Home Page (/home)

- **Purpose:** Acts as the main hub for exploring matches, interacting with match data, and accessing other areas.
- **Key Features:**
 - **Featured Matches:** Displays the top 20 matches with key information.
 - **All Matches:** Lists all matches, with an initial display of the first 5 matches.
 - **Navigation:** Provides access to other sections such as match details, team selection, and custom match features.

2.3. Select Match (/teamSelect)

- **Purpose:** Enables users to select two teams for comparison or simulation.
- **Key Features:**
 - **Team Selection:** Allows users to choose two teams.
 - **Schedule Options:** Provides options to pick an existing match or create a custom match.
 - **Custom Match Page:** Facilitates the creation of unique team compositions and match simulations.

2.4. Custom Match Input (/custommatch)

- **Purpose:** A dedicated page for creating matches from scratch.
- **Key Features:**
 - **CSV Upload:** Allows users to upload a CSV file containing player and team data.
 - **Match Customization:** Enables users to define match details such as date, format, and team composition.
 - **Simulate and Explore:** Allows simulation of matches and exploration of various outcomes.

2.5. Playground (/dreamTeam)

- **Purpose:** Central interactive feature for exploring curated teams, analyzing players, and experimenting with strategies.
- **Key Features:**
 - **Dream Team:** Displays AI-curated teams with Dream Scores to help visualize player potential.
 - **GenAI Description:** Provides explanations of team composition and predictions of player performance.
 - **Match Insights:** Displays additional match details such as pitch conditions and weather forecasts.
 - **Player Profiles:** Features interactive player cards with career statistics and achievements.

Viewing Matches

- The dashboard displays two primary sections:
 - **Featured Matches:** Matches tailored to your favorite teams or popular contests.
 - **All Matches:** A comprehensive list of all available matches.
- Users can filter matches by date using the calendar tool on the right-hand side of the screen.
- A "How-to" or "Help" feature provides guidance on utilizing platform features through a step-by-step tutorial. This feature is accessible on the homepage below the calendar.
- To view match details, select a match by clicking on it. The match details page displays head-to-head team comparisons, weather forecasts, and other relevant information.

Understanding Match Selection

- Dream11 offers an intuitive interface with animations to assist users in selecting matches through the "Select Match" option in the navigation bar.
- When selecting a match:

- Users first choose the two competing teams. The system then displays all available matches between the selected teams, with the option to filter by date using the calendar tool.
- If the match is scheduled for the chosen date:
 - Select the match to access its details page. From there, users can generate their dream team using the Dream Team feature.
 - Users can proceed with their current Dream11 squad or make adjustments, as outlined in the "Generation of Final Team" section below.
- For upcoming matches or custom contests:
 - Users may create a match by selecting a squad of 22 players.
 - If the match does not exist, users can create a custom match either manually or by uploading a CSV file containing player details, match date, and type.
 - This option is available both in the navigation bar under "Custom Match" and during the match selection process. If no matches exist between the selected teams, users will be prompted to create a custom match.

4. Creating Teams

Building Your Dream11 Team

- After selecting a match:
 - Choose players for **Team A**:
 - * Utilize the search bar to locate specific players.
 - Repeat this process for **Team B**.
- Ensure players are selected strategically to maximize team performance.

Generation of the Final Team

- Upon completing the initial player selection:
 - A dream team of 11 players is automatically generated.

- Users unsatisfied with the generated team can drag and drop players into the "Drop Player Here" area.
- Player cards provide detailed statistics and current points, enabling informed decision-making.
- Clicking on a player card reveals a detailed analysis, including performance statistics and reasons for inclusion or exclusion by the model.
- Finalize the team lineup by saving the selections.

5. Using the Custom Match Option

- The custom match feature allows users to:
 - Select the type of match.
 - Build two teams (Team A and Team B) by searching for and adding players.
 - Alternatively, users can upload a pre-selected list of players using the **Import from CSV** option.

6. Additional Features and Tips

Player Statistics

- Player cards provide detailed statistics and point summaries to assist in decision-making.

Total Dream Points

- Displays the cumulative performance score of the Dream11 team based on predefined metrics.

Regional Language Support

- Users can listen to team selection rationales and match-related information in their preferred regional language.

Undo and Save Options

- Users can undo changes, save the team, or share their team on social media platforms.

FAQs for RAG Model Integration

How do I log in to Dream11?

- No login is required. Users only need to specify their preferred regional language for better assistance.
- A comprehensive help section is available on the homepage for guidance.

How can I select a match?

- Utilize the dashboard to browse featured or all matches. Filter matches by date using the calendar tool, then select the desired match to view its details and generate a team.

What is the process for creating a team?

- Select a match.
- Choose players for Team A and Team B.
- Customize the generated team if necessary, and save the lineup.

Can I create a custom match?

- Yes, users can create custom matches via the "Custom Match" option or when no matches exist between selected teams.

Where can I view player performance data?

- Player cards provide detailed performance statistics, accessible by clicking on individual cards during team creation.
